

FACT SHEET – BUSINESS OPPORTUNITIES IN THE HAMBURG REGION

Aircraft Cabins in Hamburg

No matter where in the world you board an aircraft, there is a good chance your cabin comes from Hamburg. Our region's aircraft interiors competency stretches along the **entire value creation chain** (from R&D and education to OEM and MRO). There is a particular focus on the **development of cabins and cabin systems** and the associated interfaces, including **cabin conversions**, and specializations in: sustainability and efficiency, service and comfort, digitalisation, individuality and branding for airlines, system and process integration, manufacturing and production friendliness, modularisation, and safety & security aspects of cabin/cabin system certification.

Attention is given to digitalisation in the field of **inflight entertainment, cabin communications, guidance for crew and passengers**, as well as **MRO**. Input from **start-ups** is also being incorporated here.

A particular strength of the region is the fields of **acoustics and vibration**, as well as **digitally supported operational, maintenance and service processes**. At the same time, our network is still strategically looking for new **companies** with specific expertise in these fields.

The region has a broad competency spectrum along the entire value creation chain for cabins, with a substantial **focus on engineering**. This means: potential for new business, **equipment and system suppliers**, and **manufacturing companies in the upstream supply chain**.
